Professional Summary

Senior IT systems and network analyst with 8+ years of experience supporting, securing, and improving enterprise environments across managed services, healthcare, higher education, retail, and military operations. Strong background in Windows Server, Microsoft 365, virtualization, networking, and cybersecurity, with a track record of resolving escalated incidents, standardizing documentation, mentoring support teams, and automating diagnostics. Experienced supporting multi-site environments spanning 1,000+ endpoints across Windows, macOS, and mobile platforms.

Core Competencies

- Systems and infrastructure: Windows Server, Active Directory, VMware, Hyper-V, Scale Computing
- Networking and security: Cisco, Meraki, FortiGate, FortiClient, FortiAP, LAN/WAN, VPN, VLANs, wireless, firewalls
- Microsoft 365 and cloud: Microsoft 365, Microsoft Entra ID (Azure AD), Azure, AWS, Google Workspace, Exchange Online Protection
- DNS and email security: A, MX, TXT, CNAME, SPF, DKIM, DMARC, BIMI
- Automation and tooling: PowerShell, Python, Batch/CLI, Google Apps Script, log parsing, automated reporting
- Operations and leadership: escalation management, root cause analysis, ITIL practices, SOP development, knowledge base management, mentorship, technical training
- Tools and platforms: Microsoft Defender 365, Barracuda ESS, Adlumin MDR, FortiGate Manager, Meraki Dashboard, VMware vSphere, NCentral Monitoring

Professional Experience

Xerox IT Services

Service Desk Senior Analyst / Systems Engineer

June 2022 - Present | Columbus, OH (Remote/Hybrid) - Serve as a Tier 3 escalation point for 300+ managed clients, resolving complex systems, networking, Microsoft 365, and application issues. - Administer Active Directory, Microsoft 365, Entra ID, DNS, and endpoint deployment workflows across client environments. - Configure and support routers, switches, FortiGate firewalls, FortiClient VPNs, and wireless access points for secure multi-site operations. - Perform root-cause analysis on recurring incidents and implement long-term fixes that improve stability and reduce repeat escalations. - Write and maintain SOPs and technical documentation that standardize troubleshooting and speed cross-team handoffs. - Mentor Tier 1 and Tier 2 analysts through ticket coaching, procedural guidance, and technical training. - Partner with vendors and client stakeholders on infrastructure changes, security improvements, and service delivery. - Support healthcare clients with governance documentation aligned to HIPAA and CARF requirements.

Revolution Group

IT Consultant

November 2019 - June 2022 | Dublin, OH - Delivered managed IT consulting and support to 80+ organizations across healthcare, education, and industrial sectors. - Administered Windows Server, Active Directory, Microsoft 365, and network infrastructure across diverse client environments. - Configured DNS, SSL certificates, and secure remote access solutions for client domains and hosted services. - Implemented security best practices for authentication, data protection, and remote connectivity. - Authored technical documentation, deployment standards, and IT policies for client environments. - Trained end users and client staff on secure, efficient system use.

Goodwill Hawaii

Technical Analyst

January 2019 - September 2019 | Honolulu, HI - Built an internal documentation wiki backed by SQLite and hosted on AWS EC2 to centralize IT knowledge. - Led POS hardware and network upgrade projects across multiple retail locations. - Supported VLAN segmentation, network administration, and day-to-day infrastructure maintenance.

Hawaii Pacific University

Helpdesk Technician

October 2015 - December 2016 | Honolulu, HI - Provided Tier 1 and Tier 2 support to students and faculty for hardware, software, account, and connectivity issues. - Managed user provisioning, Active Directory accounts, and campus printing services.

United States Navy

Petty Officer 2nd Class (Sonar Technician - Surface)

January 2011 - May 2015 | Pearl Harbor, HI - Managed mission-critical sonar and IT systems operating on redundant server infrastructure. - Led a 14-person technical operations center responsible for uptime, preventive maintenance, and operational readiness. - Enforced DoD cybersecurity controls and managed classified systems in regulated environments.

Selected Projects

- Email authentication and anti-spoofing: Deployed SPF, DKIM, DMARC, and BIMI across multiple client domains to strengthen deliverability and brand protection.
- QuickBooks multi-user remediation: Tuned QuickBooks Database Server Manager, firewall rules, and port access to resolve H202 and related multi-user issues.
- FortiGate and Meraki network rollouts: Designed VLANs, DHCP scopes, and static reservations for FortiGate FG60E and Meraki MX environments.
- Windows Server administration: Managed Windows Server 2019/2022 domain controllers, DNS/DHCP, and Group Policy in hybrid Active Directory environments.
- PowerShell diagnostics and automation: Built scripts for SMB/NAS troubleshooting, DNS lookups, and log collection to accelerate escalations.

Education

Bachelor of Computer Science

Hawaii Pacific University | Graduated November 2018

Certifications

- CompTIA ITF+ (2024)
- CompTIA A+ (2019)
- Scale Computing Technical Training Certified (2023)
- Duo Help Desk Administrator (2022 - 2024)
- Webroot Endpoint Protection Technical (2022)
- Webroot Security Awareness Training Technical (2022)
